# Find the Networking style that fits you and your dreams ... and do it

- **It's a process ... refinement is good**
- **My own style:**
  - It's about connection
  - How: give (pass information, connect other people, increase their chance of success) and take (learn and leverage). Remember to take it as a factor on time management decisions
  - Who: usual advice applies ... but peer-to-peer and younger generation pays off!
  - When: find natural rhythm
  - Play my strengths and address my weakness
- **It is worth it: in career enhancements and in life**
